EDUCATION

Expert Software Developer

Sela College

July 2020 – October 2021

Completed the "Warriors to High-Tech" program at Sela College, finishing top of my class. Over 15 months, I built end-to-end projects, specializing in .NET, Angular, Node.js, and React.

Ongoing Learning and Self-Study

Fueled by curiosity, I explore Udemy courses and other resources expanding my skills beyond formal education.

EXPERIENCE

Full-Stack Developer - Moveo Group

2022 - 2023

Collaborated with a team of developers to build web applications using various technologies including AWS, .NET, Django, NodeJs and React

Backend Developer - CodeOasis

2023 - Present

Designed and implemented microservices architecture in .NET, focusing on scalability and maintainability, while also implementing security best practices to protect applications from common vulnerabilities.

ABOUT ME

- Hardworking full-stack developer seeking employment. Creative thinker with a focus on intricate problem-solving.
- Have a strong passion for mentoring, starting as a Scouts counselor and then army commander. During my studies, I've worked as a private tutor for high school math and computer science, as well as university-level CS.
- Fast learner with high desire to learn new things
- Enjoy messing around with ML and Hugging Face, always curious to see what I can create.

Military Service

November 2017 – July 2020

Served as a Commander and Sergeant in an Infantry division with high recommendations and a certificate of excellence, while collaborating with senior battalion ranks on project management and control systems.

TECHNOLOGIES

- .NET (Core / Framework)
- NodeJs / Next.js / NestJs
- Python
- SQL Server / SQLite / PL/SQL
- MongoDB
- AWS - EC2 / Amplify / Lambda / api gateway
- Azure App Service
- Git, Github, Azure devops
- React and Angular in Typescript and Javascript
- HTML, CSS, SCSS, tailwind.
